THE GLOBAL IMPACT FUND: A CASE STUDY

Advancing Sustainability and Diversity Through Investment

J.P. Morgan Private Bank’s new Impact Assessment and Contribution Tool (IMPACT) provides a robust analytical foundation for manager selection in impact investing.
J.P. Morgan Private Bank launched the Global Impact Fund (“GIF” or “the Fund”) in 2020, with the goal of committing client capital in three significant investment themes that represent both meaningful growth opportunities and the potential to make a measurable positive impact on the world, aligned with the UN Sustainable Development Goals:

- **Inclusive Growth:** Advancing the shift toward equal economic opportunity through access to financial services, quality education and training, and promoting inclusive business practices by investing in human capital. Potential investment opportunities include education technology, financial inclusion and employment training.

- **Climate Solutions:** Advancing agricultural and energy efficiency, sustainable water use, climate resilience, and the renewable energy transition. Potential investment opportunities include renewable energy transformation, electric vehicles, agriculture technology and circular economy.

- **Health and Wellness:** Advancing access to quality, affordable healthcare and treatments, and food access and security. Potential investment opportunities include healthcare inclusion and nutritional consumer products.

With more than $150 million in capital, the GIF is nearly fully committed, with allocations to seven buy-out, growth- and venture-stage private equity strategies. Additionally, the GIF has committed to ambitious diversity objectives, achieving a 49% capital allocation to fund managers that are diverse-led or -owned.

As a leader in impact investing for 15 years, J.P. Morgan was committed to launching the GIF with a best-in-class system for integrating impact into the investment decision-making process alongside risk and return, commonly referred to as “impact management.” To this end, J.P. Morgan partnered with Tideline, a preeminent impact investing consulting firm. Tideline has similarly played an important role in the growth and maturation of the...
The foundations of impact management

IMPACT builds on significant progress in the development of the impact investing industry in recent years, leading to the institutionalization of best practices and standards supporting robust impact management. Underpinning this progress has been a shift in emphasis from impact measurement to impact management, which is understood as an active effort to identify and influence, across all investments and all stages of the investment process, a broad set of opportunities to generate positive and mitigate negative impact.\(^2\)

Specifically, the system co-designed by J.P. Morgan and Tideline aligns with the following core frameworks:

- **The UN Sustainable Development Goals (SDGs).** The SDGs are a universal set of goals, targets, and indicators developed by the United Nations in 2015 to frame collective agendas over the next 15 years. The GIF intends to advance 12 of the 17 SDGs, which are increasingly being adopted by investors to demonstrate alignment to agreed social and environmental priorities.

- **IRIS+ (Impact Reporting and Investment Standards).** Launched by the Global Impact Investing Network in 2009, IRIS+ is the generally accepted system for measuring, managing, and optimizing impact. IRIS+ includes a list of impact themes and impact metrics used to assess the social and/or environmental effects of any investment or enterprise. J.P. Morgan will be collating fund managers’ existing impact reporting and encouraging funds to report against IRIS+ metrics.

- **Impact Management Project (IMP).** The IMP is an industry-wide initiative that has forged consensus on a number of fundamental frameworks for assessing impact, including the “Five Dimensions”: What, Who, How Much, Contribution, and Impact Risk.

- **Operating Principles for Impact Management (“Impact Principles”).** Launched in 2019 and incubated by the International Finance Corporation, the Impact Principles describe the essential practices of managing for impact throughout the investment process. There are currently 144 signatories to the Impact Principles, representing over $400 billion in impact AUM and growing. IMPACT assesses manager practices in line with the Impact Principles, and several underlying GIF funds are actively considering becoming signatories.

---

\(^2\) The Global Impact Investing Network defines impact measurement and management as the practice of “identifying and considering the positive and negative effects one’s business actions have on people and the planet, and then figuring out ways to mitigate the negative and maximize the positive in alignment with one’s goals.”
The Impact Assessment and Contribution Tool (IMPACT)

IMPACT is an impact ratings approach to ex-ante impact assessment. IMPACT helps to emphasize and communicate the priorities of the GIF. The IMPACT ratings approach allows J.P. Morgan to compare and contrast the impact characteristics of funds across disparate impact themes and integrate impact into the investment decision-making process, alongside the firm’s well-established approach to financial diligence.

### Investment Approach

**Due Diligence Process**
- Funds are sourced through a mix of proprietary relationships, proactive searches, referrals, and reverse inquiry
- The J.P. Morgan due diligence team screened 150+ private investment funds
- Held over 130 meetings with candidates for the GIF
- Conducted additional diligence on 30+ strategies
- Selected 8 managers for the GIF

**J.P. MORGAN ADDITIONALITY**
- Supply cornerstone capital
- Institutional validation of their investment team and process
- Amplify the work of diverse-led and/or focused managers
- Provide managers access to the J.P. Morgan network

### Impact Assessment and Contribution Tool (“IMPACT”)

1. **Screening Checklist**
   - Criteria to help identify likely ‘impact’ managers from a broader universe of potential managers.

2. **ESG and Impact Survey**
   - Impact-specific questions to collect information about the manager’s strategy and capabilities.

3. **Manager Assessment**
   - Rubric with analytical guidance to assess managers based on three dimensions: strategic intent, impact integration, and ESG.

4. **GIF Investor Contribution**
   - Framework to identify avenues for GIF to add-value as an LP to a particular manager’s impact objectives.

5. **Portfolio Management Oversight**
   - Provide IMPACT assessment summary for review by Investment and Allocation Committees.
GLOBAL IMPACT FUND: A CASE STUDY

IMPACT was designed with four core principles in mind:

1. **Seamless integration** with J.P. Morgan’s established fund diligence process;

2. **Alignment** with all relevant market standards and best practices;

3. **Completeness** in understanding a fund manager’s impact credentials; and

4. **Integrity** in documenting J.P. Morgan’s own unique contribution to the impact of its underlying investees

IMPACT includes four core pillars of analysis: Strategic Intent; Impact Integration; ESG+; and Contribution. The first three pillars are scored on a scale of low, moderate, or high, as a means of arriving at a readily interpretable understanding of a fund manager’s ex-ante impact merits. Each score is the weighted average of a pillar’s detailed sub-criteria, which have been developed to capture J.P. Morgan’s impact priorities.

**Strategic Intent**

**Purpose**

Degree to which a Manager advances progress toward one or more of the Fund’s identified target themes through its strategy, thesis, and role.

**Sub-dimensions**

40% **EVIDENCE BASE**

Robustness of evidence base in support of the Manager’s impact objectives

30% **OBJECTIVES**

Measurability and alignment of the Manager’s impact objectives with the GIF’s priority impact themes, aligned with SDGs

30% **DIFFERENTIATED VALUE ADD**

Evidence of pathways through which the Manager’s capital or role is additive to the achievement of impact, aligned with the IMP

**Analytical basis**

The GIF team has conducted assessment using evidence included in Manager pitchbooks, Manager impact reports, PPMs, and Manager responses to GIF’s ESG and impact due diligence surveys.
Impact Integration

**Purpose**
Degree to which a Manager supports its investment process with a robust impact management system and tools

**Sub-dimensions**
- **33% END-TO-END INTEGRATION**
  - Robustness and consistency of Manager’s practices in integrating impact considerations throughout the investment process, aligned with the IMP and OPIM

**Analytical basis**
The GIF team has conducted assessment using evidence included in Manager interviews, Manager impact reports, PPMs, and select responses to GIF’s ESG and impact due diligence surveys.

**ESG+**

**Purpose**
Degree to which a Manager has strong ESG practices, including risk identification and mitigation, with special attention to diversity and inclusion

**Sub-dimensions**
- **50% DIVERSITY AND INCLUSION**
  - Racial- or gender-diverse representation in the Manager’s ownership or leadership, along with the Manager’s commitments to diversity, equity, and inclusion practices

**Analytical basis**
The GIF team has conducted assessment using operational due diligence findings and Manager responses to onboarding surveys.
Contribution

Purpose
The Contribution pillar is intended to capture GIF’s own “investor contribution” to impact – its strategies for enhancing or increasing the impact of its Managers. This pillar is intentionally not rated but rather demonstrates the range of the GIF’s contribution activities, aligned with the IMP.

Sub-dimensions

1. Fund Formation

Helping influence, launch, or validate new funds by providing capital at scale. Here, GIF’s roles may include serving as a first-in or cornerstone investor, serving as a reference for other allocators, or enhancing the robustness of impact due diligence conducted. As an example, the GIF team has acted as a reference for over five of its fund managers, enabling managers to move more quickly towards institutionalization.

2. Strategy Execution

Enhancing the GP’s leverage and influence. Here, GIF may offer expertise and support to GPs through provision of direct technical assistance, active engagement as an LPAC member, and/or through serving as a co-investor. As an example, the GIF team has to date served as a co-investor in five impact-aligned deals.

3. Market Building

Driving access and inclusion for fund managers. Here, GIF may help impact GPs access J.P. Morgan’s investor and other networks. GIF may also elevate diverse fund managers and/or GPs with strategies explicitly focused on advancing diversity, equity, and inclusion through investment. As an example, through proactive discussions, the GIF team has emphasized the importance of diversity in manager teams. Post-investment, one underlying manager has subsequently increased the gender diversity of its leadership by 25%.

Analytical basis
The GIF team develops a transaction-level contribution narrative through primarily Manager interviews.

Impact assessment against the four pillars enables the GIF team to articulate the different types of impact an investment may be expected to generate, as well as how they align with the GIF’s priority areas. The output is a summary of a fund manager’s ex-ante scores—and a narrative description of the scoring rationale— included with materials considered by the investment committee in their approval of the funding commitment.
Focus on diversity

Recognizing the vast racial and gender disparity in investment management – with only 1.3% of the $69 trillion of assets under management by U.S. firms managed by substantial or majority diverse-owned firms\(^3\) – the GIF strives to achieve significantly higher levels of representation. J.P. Morgan and Tideline believe that more assets in the hands of diverse-led or -owned managers will lead to more equitable economic outcomes. While the GIF is thematically focused, J.P. Morgan recognizes this critical opportunity to proactively drive capital towards diverse-led or -owned managers, where a fund manager’s perceived limited track record or the investor’s implicit biases can lead to lower capital inflows.\(^4\) For these reasons, the GIF team opted to weight the Diversity and Inclusion sub-criteria at 50% — the highest of any sub-criteria — making this assessment the key driver of overall scoring against the ESG+ pillar.

In order to achieve a moderate or high rating on the sub-criteria, J.P. Morgan and Tideline also agreed that managers should be able to demonstrate action taken beyond the existence of a formal diversity and inclusion policy. With this goal in mind, GIF established the following preliminary criteria for classifying underlying managers,

- **Diverse ownership** is defined as at least 33% ownership by racial/ethnic minorities or women

- **Diverse senior leadership** is defined as representation of at least 33% racial/ethnic minorities or 33% women, where senior leadership can include active founders, partners, C-suite executives, or members of the Investment Committee (or similar decision-making body)

Note: For purposes of assessment, racial/ethnic minorities includes non-US based managers who would be considered part of a minority group in North America.

Using these classifications, J.P. Morgan has allocated 49% of the GIF’s capital across four diverse-led or -owned fund managers. J.P. Morgan’s diligence against these criteria has underscored the importance of diversity with the GIF’s underlying fund managers, some of which have subsequently increased the diversity of their teams. With increasing focus on, and anticipated growth of, diverse-led or -owned funds, GIF anticipates revisiting the classification criteria periodically.

---

3. John S. and James L. Knight Foundation. “How diverse is the asset management industry in the US?” (2019). Substantial diverse ownership is defined as 25 to 49 percent, and majority diverse ownership 50 percent and higher.
GLOBAL IMPACT FUND: A CASE STUDY

IMPACT in action

The following two case studies illustrate IMPACT’s implementation. Across different investment strategies, geographies, and focus areas, IMPACT provides a consistent approach to highlight, compare, and contrast fund managers on the basis of impact.

Trill Impact

Trill Impact, a European-based private equity buyout manager, targets control stakes in mid-size companies across a range of industries that have the potential to contribute to the Sustainable Development Goals. In Strategic Intent, Trill shows a diversified impact approach across sectors; during due diligence, Trill outlines an impact thesis supported by a robust evidence base for any new potential investment. In Impact Integration, Trill has developed a proprietary and robust set of impact management processes, where there are clear practices supporting the consideration of impact through each stage of Trill’s investment process. In ESG+, Trill shows meaningful diversity in its leadership and team, alongside ESG policies and independent impact assurance.

Elevar Equity

Elevar Equity, an emerging markets venture capital firm, makes early growth capital investments in markets such as India and Latin America. In Strategic Intent, the Elevar Method of investing (e.M™) focuses on three aspects: low-income customers; business models delivering essential products and services profitably, affordably, and at scale; and entrepreneurs with the ambition and ability to build businesses that address barriers of access and inequity. In Impact Integration, Elevar works to identify, measure, and manage three to five key impact metrics per portfolio company that align with business performance, thus making impact core to the business model. Elevar also identifies impact and ESG risks on a case-by-case basis and is committed to continually enhancing its sustainability risk management processes. In ESG+, Elevar demonstrates both racial and gender diversity in its leadership and team and supporting policies: 50% of Elevar’s partnership and 65% of the Elevar team is female. They have also aligned their impact measurement and management with the 2X Challenge and Beyond the Billion initiatives.

In both instances, IMPACT provides a method to capture the different modalities of impact that may be realized in a GIF impact investment. In practice, J.P. Morgan expects a range of IMPACT scores and requires no minimum pillar or aggregated score for a manager to be included in the GIF—although the lowest score of any fund manager in any pillar in the current GIF portfolio is “moderate.” The IMPACT scores can also guide areas of the GIF’s investor contribution — flagging opportunities where GIF may seek to enhance or formalize aspects of the fund manager’s practices. As the GIF is fully deployed, the GIF team aspires to provide ongoing support of fund manager practices and impact efforts.
Future directions

Impact investing is a nascent and fast-growing market in which all participants, including J.P. Morgan and Tideline, are on a learning journey. Our hope in sharing IMPACT is to illustrate one approach that enables consistent and transparent impact assessment.

IMPACT will continue to be updated and enhanced as we integrate the lessons from each transaction, with a focus on the scoring dimensions, analytical guidance for making the scoring assessments, and evidence that determine a manager’s impact diligence findings.

Now the GIF is close to being fully deployed, J.P. Morgan and Tideline’s attention will turn to post-execution impact measurement and reporting, and our commitment (shared with managers) to robustly document GIF’s impact performance against the targeted SDGs. Through this case study and our subsequent engagement with managers, investors, and the market, we look forward to making continued improvements and are committed to high levels of ongoing transparency and accountability in impact practices and performance.
DISCLOSURES

This material is for information purposes only, and may inform you of certain products and services offered by private banking businesses of JPMorgan Chase & Co. ("JPM"). Products and services described, as well as associated fees, charges and interest rates, are subject to change in accordance with the applicable account agreements and may differ among geographic locations. Not all products and services are offered at all locations. If you are a person with a disability and need additional support accessing this material, please contact your J.P. Morgan team or email us at accessibility.support@jpmorgan.com for assistance. Please read all Important Information.

Key Risks
Investment trends may not materialize. Sustainable investing and investment return are not always aligned, and may lose value

General Risks & Considerations
Any views, strategies or products discussed in this material may not be appropriate for all individuals and are subject to risks. Investors may get back less than they invested, and past performance is not a reliable indicator of future results. Asset allocation/diversification does not guarantee a profit or protect against loss. Nothing in this material should be relied upon in isolation for the purpose of making an investment decision. You are urged to consider carefully whether the services, products, asset classes (e.g., equities, fixed income, alternative investments, commodities, etc.) or strategies discussed are suitable to your needs. You must also consider the objectives, risks, charges, and expenses associated with an investment service, product or strategy prior to making an investment decision. For this and more complete information, including discussion of your goals/situation, contact your J.P. Morgan team.

Non-Reliance
Certain information contained in this material is believed to be reliable; however, JPM does not represent or warrant its accuracy, reliability or completeness, or accept any liability for any loss or damage (whether direct or indirect) arising out of the use of all or any part of this material. No representation or warranty should be made with regard to any computations, graphs, tables, diagrams or commentary in this material, which are provided for illustration/reference purposes only. The views, opinions, estimates and strategies expressed in this material constitute our judgment based on current market conditions and are subject to change without notice. JPM assumes no duty to update any information in this material in the event that such information changes. Views, opinions, estimates and strategies expressed herein may differ from those expressed by other areas of JPM, views expressed for other purposes or in other contexts, and this material should not be regarded as a research report. Any projected results and risks are based solely on hypothetical examples cited, and actual results and risks will vary depending on specific circumstances. Forward-looking statements should not be considered as guarantees or predictions of future events.

Nothing in this document shall be construed as giving rise to any duty of care owed to, or advisory relationship with, you or any third party. Nothing in this document shall be regarded as an offer, solicitation, recommendation or advice (whether financial, accounting, legal, tax or other) given by J.P. Morgan and/or its officers or employees, irrespective of whether or not such communication was given at your request. J.P. Morgan and its affiliates and employees do not provide tax, legal or accounting advice. You should consult your own tax, legal and accounting advisors before engaging in any financial transactions.

Conflicts of Interest
Conflicts of interest will arise whenever JPMorgan Chase Bank, N.A. or any of its affiliates (together, "J.P. Morgan") have an actual or perceived economic or other incentive in its management of our clients’ portfolios to act in a way that benefits J.P. Morgan. Conflicts will result, for example (to the extent the following activities are permitted in your account): (1) when J.P. Morgan invests in an investment product, such as a mutual fund, structured product, separately managed account or hedge fund issued or managed by JPMorgan Chase Bank, N.A. or an affiliate, such as J.P. Morgan Investment Management Inc.; (2) when a J.P. Morgan entity obtains services, including trade execution and trade clearing, from an affiliate; (3) when J.P. Morgan receives payment as a result of purchasing an investment product for a client’s account; or (4) when J.P. Morgan receives payment for providing services (including shareholder servicing, recordkeeping or custody) with respect to investment products purchased for a client’s portfolio. Other conflicts will result because of relationships that J.P. Morgan has with other clients or when J.P. Morgan acts for its own account. Investment strategies are selected from both J.P. Morgan and third-party asset managers and are subject to a review process by our manager research teams. From this pool of strategies, our portfolio construction teams select those strategies we believe fit our asset allocation goals and forward looking views in order to meet the portfolio’s investment objective. As a general matter, we prefer J.P. Morgan managed strategies. We expect the proportion of J.P. Morgan managed strategies will be high (in fact, up to 100 percent) in strategies such as, for example, cash and high-quality fixed income, subject to applicable law and any account-specific considerations. While our internally managed strategies generally align well with our forward-looking views, and we are familiar with the investment processes as well as the risk and compliance philosophy of the firm, it is important to note that J.P. Morgan receives more overall fees when internally managed strategies are included. We offer the option of choosing to exclude J.P. Morgan managed strategies (other than cash and liquidity products) in certain portfolios.

Legal, Brand & Regulatory Information
In the United States, bank deposit accounts and related services, such as checking, savings and bank lending, are offered by JPMorgan Chase Bank, N.A. Member FDIC. JPMorgan Chase Bank, N.A. and its affiliates (collectively “JPMCB”) offer investment products, which may include bank-managed investment accounts and custody, as part of its trust and fiduciary services. Other investment products and services, such as brokerage and advisory accounts, are offered through J.P. Morgan Securities LLC (“JPMS”), a member of FINRA and SIPC. Annuities are made available through Chase Insurance Agency, Inc. (CIA), a licensed insurance agency, doing business as Chase Insurance Agency Services, Inc. in Florida. JPMCB, JPM and CIA are affiliated companies under the common control of JPM. Products not available in all states. In Luxembourg, this material is issued by J.P. Morgan Bank Luxembourg S.A. (JPMBL), with registered office at European Bank and Business Centre, 6 route de Tresves, L-2633, Senningerberg, Luxembourg, R.C.S Luxembourg B10.958. Authorized and regulated by Commission de Surveillance du Secteur Financier (CSSF) and jointly supervised by the European Central Bank (ECB) and the CSSF. J.P. Morgan Bank Luxembourg S.A. is authorized as a credit institution in accordance with the Law of 5th April 1993. In the United Kingdom, this material is issued by J.P. Morgan Bank Luxembourg S.A., London Branch, registered office at 25 Bank Street, Canary Wharf, London E14 5JP. Authorised and regulated by the Prudential Regulation Authority. Subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details of the Temporary Permissions Regime, which allows EEA-based firms to operate in the UK for a limited period while seeking full authorisation, are available on the Financial Conduct Authority's website.
